

Erasmus+

KA2 - Cooperation for Innovation and the Exchange of Good Practices
KA203 - Strategic Partnerships for higher education

Welcome to the InovSafeCare Multiplier event, which is held as a part of Savonia University international week.

The workshop "Innovative Methods to Motivate Health Care Students to Learn Infection Prevention and Control Practices" takes place virtually on Tuesday 23th February 2021.

The workshop is presented by the Finnish InovSafeCare team members PhD, Principal lecturer Marja Silén-Lipponen, MNSc Senior Lecturers Leena Koponen and MHSc Ulla Korhonen and MNSc Lecturer Mikko Myllymäki.

Healthcare associated Infection prevention and control (HAI) has always been an important part of health care professionals' education. The COVID-19 pandemic shows that IPC knowledge and skills are vital among health care professionals. This workshop presents the new innovative learning methods E-book and Simulation besides the InovSafeCare Model produced during the InovSafeCare project.

- 12.30-13 Presentation of the InovSafeCare project.
Marja Silén-Lipponen
- Presentation of the InovSafeCare community.
Project manager Pedro Parreira, Coimbra University, Portugal
- 13-13.45 Presentation of the E-book as an innovative learning method for supporting healthcare associated infections (HAI) prevention and control.
Leena Koponen and Mikko Myllymäki
- 13.45-14.30 Introducing simulation as a multi-channel and reality mimicking learning method to learn infection control principles. Marja Silén-Lipponen and Leena Koponen
- 14.30-15 Presentation of the InovSafaCare Model and Savonia's results of the agile piloting of the model. Ulla Korhonen
